

Working with developers to save costs

The **TDS** group of companies operates in the UK through a number of regional bespoke companies for both residential and commercial developers providing a variety of engineering related services including:-

- Highway and Sewer Engineering Design
- Design and Practical Application of SUDS
- Engineering Project Management
- Utility Applications
- Management of Site Adoptions
- Resolution of all Post Development Issues
- Contesting of Utility Costs
- Consultancy to the House Building Industry

The focus and expertise of our staff that are predominantly from a developer background puts **TDS** in a unique position of being able to understand the priorities and objectives of our clients. This can no better be reflected than in the way **TDS** make substantial cost savings on utility charges on past and ongoing sites.
